# digitalSTROM IC T4-LJ

## 4 way button including double rocker

article No.: 3006.1911.24.0001

GTIN: 4260385582409

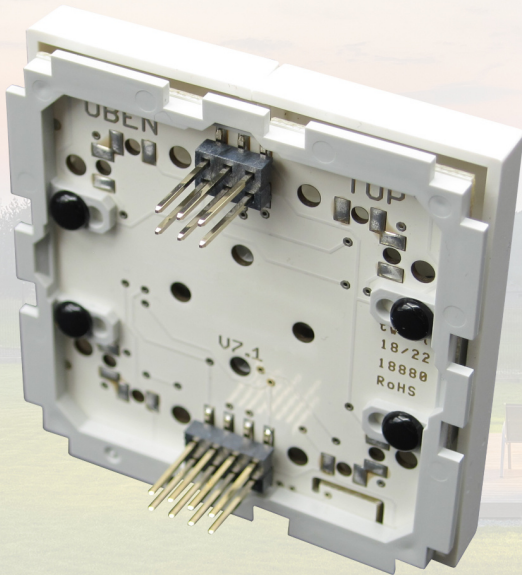

## Function:

The "IC T4-LJ is a digitalSTROM 4-way button with four tactile positive pressure points. By arranging the rockers with two touch points at the top and bottom, 1 or 2-way functions can be used in the digitalSTROM system.

The four tactile points each have their own DSiD and can be used as jokers (black), for light (yellow) or shading (grey) in the dS system. The latest 300 dS technology is integrated. The "yellow" function can be performed in dimming or switching mode. The dS system function can also be seen on the back of the module housing.

Each button can trigger moods 1-4 through multiple operation. Only L and N need to be connected. The dSready product is pre-parameterized and ready to use.

The upper part of the button with the rockers is plugged onto the module. A fixing frame ensures that commercially available 55mm frames from different switch manufacturers can be mounted.

Picture of the back of the button top

## Scope of delivery:

The IC T4-LJ button is delivered to dSready with the two button rockers in (similar) pure white RAL9010. Only L and N have to be connected and the product can be used immediately in the dS system. Switch frames are not included.

## Operating modes:

The operating mode can be changed using the digitalSTROM Server installation software. Below is an example of LIGHT or SHADING (1/2 way).

## Assignment of button rockers and DSiDx:

## Technical specifications

Nominal input voltage/frequency ..... 230 V AC/50 Hz

Power consumption ..... ca. 0,2 W

Dimensions frame ..... 55 x 55 mm

Installation depth ..... 23 mm

Degree of protection ..... IP 20

Permissible ambient temperature operation -5 °C .. +40 °C

Rocker switch color pure white glossy .....RAL 9010

Permissible ambient humidity (operation)  
< 80% rF nicht kondensierend

Data transmission via 230 V AC Netz  
digitalSTROM-Protokoll V1.0

RoHS
